Linaro

Review Change Boards

- [Pack Specification Change Board](#)

- [Solution Specification Change Board](#)

For Review

- Best way to handle components selection/removal in a project #466
- Yet another doubt about the concept of component ID #157
- Any feed back on project structure ?

    - AWS_MQTT_MutualAuth_Demo

- Request for contribution:

    - [packchk] embed XML validation as an initial validation step #506

- Please help us on tickets with label: question

Update CMSIS-Toolbox

- Version 1.2.0 of CMSIS-Toolbox - by Oct. 11th 2022
    - 'csolution' support for RTE folder located in layer
    - 'csolution' initial implementation of [CBuild Output Files](#)
    - 'csolution' add pack loading policy command line option
- Add 'linux arm64' as an additional supported host platform

Wrap Up

- Other review "asks" before finally closing issues:
  - Anything still open for "Discussion Done" items.
  - Can you provide answers for "Question" items.

- Next Open-CMSIS-Pack meeting: 11th Oct. 2022 @ 16:00 CET (15:00 UK)

Thank you

Linaro
